

DANES MOSS

Access: The reserve is open to all. Please keep to the paths.

Location: The Moss lies to the south of Macclesfield, between the A536 and the Macclesfield - Kidsgrove railway line. The Trust nature reserve lies to the south of the footpath which runs roughly east-west across the southern end of the area (O.S. Grid Ref.: SJ907704).

Habitat Summary

Danes Moss SSSI (13.4ha), is the largest and highest lowland raised bog in Cheshire. A cut-over, lowland, raised mire SSSI, surrounded by a woodland fringe. Characteristic bog plants include sphagnum mosses, cotton grass and cross-leaved heath.

Don't forget to submit your records via the link on the CWT website reserves page.
