

GOWY MEADOWS

Access: The reserve is open to all. Please keep to the paths.

Location: The reserve lies alongside the River Gowy north of Chester, with the A5117 to the north and the M56 to the south (O.S. Grid Ref.: SJ435740).

Habitat Summary
The Gowy Meadows is an extensive area of lowland grazing marsh, covering a total area of 165.8ha (409.7 acres). Approximately 80ha of the site is designated as a Grade A Site of Biological Interest (SBI) due to the rich flora within the ditches.

Don't forget to submit your records via the link on the CWT website reserves page.
